

Founded in 1947, **Foundry F.lli Pagliotti** has been always abreast of new technologies on casting bronze alloys, with the primary aim of the satisfaction of its clients through the provision of high quality semi-finished parts free from any kind defect and as soon as possible.

Born as a foundry for sand and shell casting, it was subsequently made known to have installed, as one of the first foundry in Italy,the machines to make **CENTRIFUGAL TUBES/PIPES** in all the alloys of tin bronze, aluminum-bronze, lead bronze, and in special alloys of manganese brass. We can also provide **CONTINUOUS CAST BARS IN BRONZE** in sections round solid, perforated, flat and square.
